New York, Saturday, June 6, 1863.

Ottawa and Champlain Canals.

We have before us a report of the select committee of the Canadian parliament, to whom was referred at its late session, the subject of the Ottawa Canal; or in other words, that of a water communication between Montreal and the Georgian Bay of Lake Huron by the way of the Ottawa River. We have in the course of the last few months kept the readers of the JOURNAL acquainted with the latest movements in that direction, and these have acquired great importance since the question of a ship canal between the Mississippi and the Hudson has been agitated in Congress, the New York Chamber of Commerce, and our own State Legislature.

The report illustrates the practicability of establishing a navigable line of communication by the Ottawa and Mattawan Rivers, Lake Nipissing and French River, a route indicated by the maps as a natural one, and proved to be such by beyond all doubt, that a through navigation with

MR. FREDERIC ALGAR, No. 11 Clements Lane | the enlargement of the Lachine Canal and contemplated locks with chambers of 250 by 50 feet. If the Lake of the Two Mountains can be made a part of the line, as it is now asserted it can be, the cost will be reduced by three millions. If a mere boat canal were constructed with six feet draught of water and locks 250 by 30 feet, the outlay necessary would be but six millions. This proposition finds however, but little favor. The distance saved is thus stated:

> From Montreal to Mackinaw by the St. Lawrence and lakes is 1,108 miles. And by the way of Ottawa......... 650

Gain of the latter route 368

The difference of time is also estimated in the report as follows, allowing the speed of a vessel on the river and lakes at 8 miles per hour, on the canal 3, and 11/2 minutes detention in locks for each foot of water filled or emptied during the

1st the Welland Canal voyage and route require......196 hours.

It is also stated that the Lake Nipissing and others near the source of the Mattawan should be united and be made a summit feeder to supply the connecting links to the Huron and to the Ottawa, in the one direction fifty miles, and the other thirty; and the supply will be equal to any demand for slack water or canal navigation. All other desiderata are found without difficulty by the engineers in the shape of harbors, levels and streams. It is not necessary for us to repeat the arguments of the report in favor of the project founded on the immense production of the Northwestern States. This latter is well-known to the readers of the JOURNAL from the numerous statements which have from time to time appeared in its columns. The most interesting portion of it however, is that which avowedly favors the construction of a ship canal between the St. Lawrence and the Hudson Rivers, as a continuation of the Ottawa improvement, and the suggestion comes several minute surveys. By these it is ascertained at a very auspicious moment for its examination and consideration. It is not a new idea, though twelve feet of water may be obtained at an ex- it comes in a new dress and makes a most respectpense of \$24,000,000, and that it will shorten the able appearance. If ship canals are to come into distance between Montreal and Chicago three fashion, here is a good opportunity to be embraced

River is sixty-nine miles in length and navigable from its mouth to Chambly, from whence a short canal proceeds to Lake Champlain. The Chambly Canal connects the St. Lawrence by a canal from St. John to Chambly basin, and is 121/2 miles long by 24 feet wide, with a depth of water of 8 feet, and a lockage of 74 feet only. The lake is navigable for yessels of the largest size for its whole length to Whitehall, where the Champlain Canal debouches, and this canal sixty-four miles long connects at its Southern termination with the Hudson. The cost of the construction of the latter was but one million two hundred thousand dollars, and to enlarge it would not be costly. It has also innumerable sources of water supply, and its whole lockage is but eighty-four feet.

The idea of a ship canal in this direction has been a favorite one with the statesmen of the time. In the House Documents No. 136 communicated to Congress in 1852, by the then Secretary of the Treasury, Thos. Corwin, we find the following statement: "The construction of a ship canal from the St. Lawrence to Lake Champlain so as to bring the propellers of Chicago to Burlington and Champlain is now engaging the consideration of the Canadian Government. The project originated with the Hon. John Young, Chief Commissioner of the public works in Canada; and there is little doubt from the favor it has received from the public that it will be speedily accomplished. The cost would only be between \$1.500,000 to \$2,000 .-000, and its construction is indispensable to protect the revenues of the St. Lawrence Canals from the competition of the Ogdensburg Railroad. The construction of such a work must produce a corresponding enlargement of the Northern New York Canal, whereupon there will be a connexion between Lake Erie and tide water on the Hudson via the St. Lawrence, which may be navigated without transhipment, downward in four and upward in five days." Nor was the existing trade even in 1851 on the Chambly Canal an unimportant one. It is stated in the same report that the tonnage of British bottoms, over it was then 81,-594 tons, and American 9,147 tons.

The State Engineer of New York in his report of February 1851, also said "there is another and I apprehend a still cheaper route by water to Lake hundred and fifty miles. This estimate includes at a comparatively small expense. The Sorel Champlain, soon to come into competition at the

North, which will produce as cheap or cheaper rates to Boston than the above; (via Ogdensburg Railroad.) The freight by that route affoat on Lake Champlain may find cheaper transport to New York than to Boston."

The value of the local trade in that year was of itself enormous, the Canadian traffic of the Vermont district alone was \$1,552,325; the tonnage of Lake Champlain was 197,500 tons.

The Canada trade of the Champlain districts in the same year was reported at \$1.043.286.

Nor is this the only evidence at hand which bears on this subject. We have before us the proceedings of a meeting held in Troy in 1849, at which Major-General Wool presided, and also a report of the Montreal Board of Trade, of which Thos. Ryan, Esq., was President. The feasibility of the plan and its enormous advantages were fully set forth in the documents referred to, and are found in another report of the Secretary of the Treasury on the commerce of British America. We quote from this the following interesting statements: "To the City of New York the construction of this work is of the greatest possible importance. With the Champlain Canal of sixty-six miles to Troy, or seventy-two to Albany, enlarged to the same size as the proposed canal (the Chambly Ship Canal,) vessels from any Western lake port could without breaking bulk discharge at the port of New York, and could there reload with emigrants and merchandize direct for the West." We have not space to give all the calculations which accompanied this statement, by which the advantage in distance, lockage and time was shown over that enjoyed by the route of the Erie Canal. We may find it necessary to go into the subject at greater length on some future occasion.

But we have said enough to show, we believe, that while the subject of ship canals is receiving so much attention, the plan to connect the St. Lawrence with the Hudson by the way of Lake Champlain is fully entitled to the gravest consideration, and the convention at Chicago will not have half done its duty to the West or the East without giving it very full and a very impartial examination. As regards the particular interests of the City of New York we may ask a single question. Is it best to have a ship canal that will secure the trade of the West from one point, Chicago, or by another cheaper route which will not only get the Chicago trade, but of all the lakes, and the Ottawa and St. Lawrence Rivers ? "We pause for a reply."

The Five-Twenty Bonds.

A great many inquiries are made for explanations of these bonds, especially from people from the interior who have money to invest at 6 per cent., but suppose that the 5-20's only draw 5 per cent per annum. For the benefit of such the following explanations are given:

Five-twenty bonds draw six per cent interest, payable semi-annually, in coin, with coupons attached. Coupons are certificates, each representing six months interest on the face of the bond, and one is cut off and retained by the Treasurer of the United States when the interest for each six months is paid. They are called "five-twenty bonds" from the fact of their being made redeemable at the option of the government in five years, and payable in twenty years. Registered bonds are made payable to order, and are transferable at the Treasury Department. They draw six per cent interest, payable semi-annually, in coin, which

is endorsed when paid, as they contain no coupons. Five-twenties are payable to bearer, and therefore the holder is, prima facie, owner, and can draw the interest. Certificates of indebtedness are now made payable in one year from date with six per cent interest, payable with the principal when due. All two years certificates that have been issued are now due and interest stopped, by public

Pacific Railroad of Missouri.

The earnings of this road for the fiscal years ending February 28, 1862 and 1863, have been as

would, from the fact that the government pay, for transportation between St. Louis and Rolla, only the actual cost to the company of the work, leaving no margin of profit; and this traffic to and from Rolla is a very large share of the whole year's business. The report says:

It will be seen, on referring to the last Annual Report, that the debt at that time, excluding that of the State was as follows, viz:

Audited accounts Making in the aggregate \$402,192 97

All of the foregoing debt has been fully paid, excepting three notes given Messrs. Diven, Stancliff & Co., amounting in the gross to nearly seventy-five thousand dollars; being balance due for work on the Southwest Branch; the payment of the same being secured by mortgage on the un-sold "Free Bonds" belonging to the Main Line— there being no security of the Branch to give the contractors who had in good faith given their labor to that work.

The audited accounts shown in the annexed statement have at this date been paid, and there is no debt of the Company other than the State's

that could not be paid on presentation.

The Company, for all its supplies as well as material for replacing the road, asks no credit, but on the contrary all purchases are made at the

lowest market price for cash. .
All indebtedness of every character incident to, and growing out of, dealings with Messrs, Kirk-wood, Porter & Co., and Thomas L. Price, in their several contracts with the Company, have been settled, paid, and receipts for the same in full are filed in the proper office of the Company.

It was seen early in the year that the rolling stock of the Company was insufficient for the business offering; indeed, the Chief Engineer had in the two last Annual Reports urged upon the Directors the necessity of increasing the same, and notwithstanding there was a considerable out-standing debt of the Company, yet it was deemed expedient to increase the motive power; and although two new locomotives were put on the track in May, yet orders were issued for the completion of two others, and the same were placed on the track in January—all of which have been paid for. In this connection, it is well to state that orders had been issued before the greatly increased price in engines, as well as everything else, for four more locomotives, all of which will be delivered during the present spring.

From time to time, our own shop, under the management of Mr. Charles Williams, Master Mechanic, has turned out forty freight cars, and good progress has been made on twenty-five

We especially refer to the succinct and intelligent report of Mr. Thomas McKissock, Chief Engineer and General Superintendent, for the details of the year. He shows, among other interesting matters, that several of the bridges have been entirely rebuilt, while others have been extensively repaired, as well as one span of the Osage, and two spans of the Gasconade replaced, and others will be the ensuing year. On the Main Line, up-wards of fifty thousand, and on the Branch, twenty thousand cross-ties have been renewed; while five hundred tons of iron rails, from the Cambria Works, have been purchased and placed in the works, have been purchased and placed in the track to supply those worn—the ties and iron alone costing upwards of fifty thousand dollars, which is charged as track repairs to transportation; also, that the repairs to locomotives and cars at our own shop have been very extensive; and in fact the rolling stock and road itself is in a better condition than at any time in three years

The water tank at Sedalia, as well as the station

track and rolling stock, the road has been operated senger and 22 freight locomotives; 20 first class,

at an expense of 56.9 per cent.
But little progress has been made in the extension of the road the past year, owing to the large outstanding debt, and the continued and increas-ing demands for materials, rolling stock and repairs, yet the rail is laid to Dresden, distant seven miles from Sedalia, and the road will be operated to that point in a few days; while the road bed is being graded to Knob Noster and Warrensburg, and unless some unforeseen calamtty befalls us the road will be opened to the latter point during

The Board had confidently hoped that the General Assembly at its late session would have provided for the immediate extension and completion of the road to Kansas City, and with that view proposed such measures as would, in their judg-ment, have accomplished the purpose; but the General Assembly thought otherwise, and ad-journed without giving the road any legislation other than a bill instructing the Governor not to sell the railroads until otherwise instructed.

Since the last Annual Report the remaining "Free Land Bonds" outstanding have been purchased, and the same destroyed and the lands

wholly released of the entire encumbrance.

The Company have not been able to consumate satisfactory contract with the General Post Office Department for the transporting of the United States mails, but, from late information, at an early day the whole matter will be satisfactorily arranged; the contract having expired last July, the amount due on the contract, if the same is re newed, is \$22,224 13.

SOUTH-WEST BRANCH.

There has been no extension of this road since the last Annual Report, and the road is still subject to forfeiture by reason of the act of the General Assembly, approved March 3d, 1857.

The road remains in an unfinished condition, with all its means applicable to its construction exhausted, excepting its county and individual subscriptions which are wholly unavailable, and

is at this time largely in arrears to the Main Line.

The same care has been extended to this road, bridges, rolling stock, &c., as to the Main Line, and it may be safely stated that the same is in

good condition.

Efforts were made to get the General Government, as a military necessity, to extend this road, and although at one time we were in hopes that such would be done, yet nothing definite has as yet been settled on; but we still continue our ex-

On referring to the last Annual Report, it will be seen that Congress by joint resolution, approved March 11th, 1862, instructed the Secretary of War to adjust and pay this road for transportation, notwithstanding they claimed the land grant re-

quired the service free of charge.

The joint resolution, referred to, required the accounts to be adjusted on the basis that the Company were to have "as near cost as may be." Every effort was made to obtain, in the adjustment of our accounts, some allowance for the cost of constructing the road, but without success; so for transportation over the road from St. Louis to Rolla, the Company is only allowed "as near cost as may be," and on the accounts adjusted under the said resolution the deductions are as

tracting from the gross earnings at the cost of the operating expenses, or what would have been net earnings of the roads:

follows, which is a dead loss to the Company, sub-

There has been little, if any, business in the Land Department, as the whole country around the Granby Mines is desolated, which has entirely destroyed all revenue from the leases on the mineral land of the Company. There has been no change in the policy of the Directors in the general management of the road, and the same care in guarding the track our predecessors inaugurated still continues

7 second class, 1 hospital, 6 baggage and express, and 414 cars for freight, etc; also 21 stationary engines for pumping water, sawing wood, etc.

President .- GEORGE R. TAYLOR.

Vice President .- DANIEL R. GARRISON.

Directors.—George R. Taylor, Robert Campbell, Adolphus Meier, James E. Yeatman, Oliver A. Hart, Robert Barth, John Cavender, Henry L. Patterson, Daniel R. Garrison, Robert K. Woods, Benjamin Stickney, Charles H. Peck, Wm. M. McPherson.

Secretary and Treasurer .- FREDERICK L. BILLON. Chief Eng. and Sup't-T. McKissock.

Exports of Great Britain.

From the British Board of Trade returns for the month of March, which have just been issued. we learn that the total exports of British and Irish produce and manufactures for the month, and three months ended 31st March, in the last three years, were as follows:

	For	the month.	For the 3 months.
1861		£10,958,830	£27,660,248
1862		9,664,000	26,423,763
1863			27,561,204

These returns compared with the corresponding month of last year, show an increase of £552.824. The equipment of the road consists of 12 pas- or nearly 6 per cent, in the declared value. Com- the petition.

pared with March, 1861, which was a rather active month, there is a decrease of about 61/2 per cent. The British shipments of cotton goods have been only about 10 per cent. less in value than those of last year, and 35 per cent. less than those of March, 1861.

Lateral Railroads in Pennsylvania .-- The Acts of 1832 and 1858.

THE NECESSITY OF A PROPOSED ROAD, AFTER AN APPEAL FROM A REPORT BY VIEWERS, IS A QUESTION EXCLUSIVELY FOR THE COURT. THE ONLY QUESTION FOR THE APELLATE JURY IS THE AMOUNT OF DAMAGES.

On the 10th of December, 1859, John H. Peterson and James B. Corey, filed their petition in the District Court of Allegheny County, for a lateral railroad twenty feet in width from their coal mines through the coal lands of Wm. H. Brown, to the Monongahela River. Viewers were appointed December 31st, 1859, who reported on February 24th, 1860, the road necessary and useful for private purposes, and finding the damages to Wm. H. Brown to be \$2,500. After the report of the viewers was filed, Wm. H. Brown filed exceptions, which were on hearing dismissed, the Court being of the opinion that the road was necessary for private use. On the 13th of March, 1860, he appealed from this finding and report; and on the 14th of April, 1860, Corey and Peterson filed their bond, with sureties in \$5,000, reciting their application for a lateral railroad, and conditioned "that the said James B. Corey and John H. Peterson, their heirs, executors or administrators, will and truly pay or cause to be paid unto the said Wm. H. Brown, his certain attorney, heirs, executors, administrators, or assigns, all such damages as may be assessed in favor of the said Wm. H. Brown, under the provisions of the said recited act and its supplements without any fraud," &c., &c. This bond was given under the act of Assembly, approved April 20th, 1858, entitled "a further supplement" to the act entitled, "An act regulating lateral railroads," passed May 5th, 1832. Under this act of Assembly and bond. Corey and Peterson entered upon the strata of coal owned by William H. Brown, and drove their road nearly through the same, cutting across Brown's coal in such a manner as to prevent him from driving his main entry through the same to large bodies of coal which he owned in the rear of said road. During the progress of their work, and after they had commenced, complainant filed his bill for an injunction, but owing to recess in Court it could not be heard. The motion for a preliminary injunction was argued, when the Court suggested that, as they had great doubts about the act, and had refused to approve other bonds, since a careful examination of the act defendants should answer, and have the case put in shape for a final decision by the Supreme Court.

The complainant after reciting the facts, claim-

1. That under this bond he had no security for his coal taken and other damages, in case he should succeed in finally defeating the road on his appeal.

2. That after the appeal was taken, the proceedings to file and approve the bond, and construct and use the road were not legal and valid; and,

3. That the bond should have been filed with

forma, and on hearing the case on bill and answer, proposed road was necessary, and trying it before with costs. The case was then removed to the of several owners, as many appeals might be Supreme Court of the State, and argued by the taken as there were owners, and on the trial of counsel of the respective parties. The complainant counsel maintained that the bond required by might find the road necessary, and a sixth find the act of Assembly does not furnish adequate against it. This was an anomaly and productive security as required by the fourth section of the seventh article of the constitution, because it pro- or to the land owners. To remove some of these vides only for "such damages as may be assessed evils, if not all, the supplementary act of April under the provisions of the act to which this is a 20th, 1858, was passed. It obviously intended supplement." The act thus referred to, viz., of that the question, whether the road is necessary May 5th, 1832, contains no provision for the or not, shall no longer be open after the viewers assessment of damages in case the road should be and the Court have passed upon it and found it found unnecessary by the jury on the appeal, before to be so. It expressly requires the viewers to whom the necessity or usefulness of the road is report in writing whether the road asked for is an open question. But even if the act were free from all objections, it requires that the bond shall not found in the act of 1832, and then, if the be filed with the petition which was not done in this case. For the defendant it was contended "opening, constructing, completing and using the that the only question to be tried on the appeal in this case was the amount of damages.

The following opinion was delivered by the Supreme Court upon the decision of the case, affirming the decree of the District Court:

STRONG, J .- This appeal raises the question whether under the lateral railroad act of 1832, and its supplement of April 20, 1858, the determination of the necessity and usefulness of the proposed road, is, after an appeal from a favorable report of viewers, exclusively for the Court; or whether it is to be submitted to the appellate jury for retrial. In Horner and Roberts' Lateral Railroad, (1 Wright 33,) we said it would seem that all which can be tried by the jury on the appeal since the supplementary act of 1858, is the amount of damages. After reviewing the construction which we then gave to the statute, we are convinced that it carries out the legislative intention, and is the only one which would not lead to absurdity. The course of legislation from 1832 to the present day evidences that the policy of encouraging lateral railroads has been growing in favor. Even the first act that of May 5th. 1832, while it allowed an appeal from the report of viewers, did not require that those viewers should report upon the necessity of the road, nor did it expressly enact that the appellate jury should pass upon it. This Court, however, decided in Harvey vs. Lloyd, as well as in Hays vs. Risber, that on the trial of the appeal the jury should not only assess the damages of the land owner, but also find whether the proposed road was necessary and useful for public or private purposes. This construction of the law made it a departure from the legislative usage which has always prevailed in providing for appeals from reports of viewers upon the damages caused or expected to be caused by the location and construction of other railroads. In such case the appellate jury have nothing to do with the question of the necessity of the road. It is observable also, that the act of May 5th, 1832, as construed, worked several practical inconveniences. applicant for a lateral railroad was compelled to await, not only the trial of the appeal, but also the result of a writ of error (which by a supplementary act was allowed,) before he could commence the construction of the road. In many cases also there was imposed upon him the burden and of the Pennsylvania Companies, and Wm. company, that fund has been increased during the

The Court below overruled the demurrer, pro of trying repeatedly the question whether the Thorp, Secretary of the same, resigned previous decreed that the complainant's bill be dismissed different juries. If the road passed through lands ed to succeed both as local Treasurer and Secreeach the same issue be presented. Five juries of no good, either to the petitioner for the road necessary for public or private use, a requirement Court concur with the viewers, authorizes the road," notwithstanding appeals from the report of viewers upon the applicants giving bond to pay the damage thereafter to be assessed. It is not to be supposed that the legislature meant to authorize the construction and use of the road while its necessity remained undetermined. Such a provision could have benefited nobody. No road would ever be constructed during the pendency of an appeal, if the apellate jury might find it unnecessary, and by their finding defeat all right of the applicant to use the road and make his expenditure in its construction a dead loss. And it may be inferred that the Court and not the jury was designed to be the final judge of the necessity, from the fact that no provision is made for the assessment of damages, in case the road should finally be defeated. The act contemplates no defeat of the road as possible, after the viewers have reported it necessary, and the Court concurring in their opinion have affirmed the petitioner's bond. We hold, therefore, that in these cases the necessity of the road asked for is not a question to be submitted to the appellate jury.

It follows that the complainant has security for all the damages which he can sustain, and that the answer of the defendants to which he demurred was a full defence to his bill.

Let the decree of the District Court dismissing the bill of the complainant be affirmed.

Atlantic and Great Western Railway.

At the annual election of the "Atlantic and Great Western Railway in New York," held at the company's office in Jamestown on the 25th ult., the following gentlemen were chosen directors for the ensuing year:

Wm. Reynolds, J. J. Shryock, Wm. Thorp and John Dick, Meadville, Pa.

Wm. Hall, A. F. Allen, W. D. Shaw, and S. E. Marvin, Jamestown, N. Y.

M. Kent, Franklin Mills, Ohio; W. S. Streator, Cleveland; N. Marsh and S. L. M. Barlow, New York; and T. W. Kennard, London, England.

At a subsequent meeting of the new board, Wm. Reynolds, Esq., was elected President, and W. A. Bradshaw, Esq., Secretary and Treasurer. Executive Committee appointed: W. Reynolds, A. F. Allen, Wm. Hall, J. J. Shryock, T. W. Ken-W. S. Streator.

to the election, and W. A. Bradshaw was appointtary.

J. M. Dick has been appointed Treasurer and Secretary of the Central organization.

Alex. Sheldon, Esq., has been appointed Council and Attorney for the company.

Boston and Lowell Railroad.

The earnings of this road for the year ending September 30, 1862, were:

From	passer	ng	e	rs										\$175,198	32

Bonds 12,000	00		
Interest, taxes, etc 2,044	10		
Materials 3,255	76		
		10.993	9

Balance in treasury \$1.175 15 The gross earnings exceed those of the preceding year \$5,893 36, with an excess of expenses of only \$224 89-making the increase of net earnings \$5,668 47.

There were carried over the road during the year 5,639 way and 949 through passengers. Tons of freight received, 14,035; do., forwarded, 18,-384—difference 4,352 tons. Number of miles run by engines, 49,608. The report says:

The contract with the Littlestown Railroad Company for working that road, expired on the 1st of January, and that with the Gettysburg Railroad Company expired on the 1st of April. Owing to the very considerable advance in all kinds of supplies, and also of the labor required to operate railroads, it was found necessary to H. Kerr, Directors.

past year by the payment to the trustee of \$18,300, advance the rates on the former company from \$4 per day, to \$125 per month—and on the latter company from \$400 to \$475 per month—amounts which barely indemnifies this company for its disbursements. Under the existing circumstances, however, when the transportation business of this road does not furnish constant employment for two setts of hands and is beyond the capacity of one sett, it is doubtless an advantage to operate these roads at a moderate charge. An agreement has also been made with the former contractor for the repairs of the road, at an advance of \$300 over previous contract-or of \$2,800 for the year, including the ballasting of three miles of track An understanding has also been effected with the Hanover Telegraph Company, which has been recorded in the respective journals, by which the duties of this company are more clearly set forth

and its privileges more effectually guaranteed.

The stock account of shareholders, on which partial payments on stock only were made, still remaining open on the books of the company, has by a resolution of the board been closed, and in compliance with the 18th section of the charter (which gives authority after due notice, and which notice was given to the delinquent stockholders,) have declared such stock and payments thereon, forfeited to the company. The report of a committee of stockholders to investigate the stock account, shows that the whole number of shares originally subscribed, was 2,417—of which number 2,336 were paid in full, 35 shares paid in part, and 46 on which no payments have been made. If the result of this investigation be sustained, the capital stock of the company will be \$116,800.

The large amount of capital seeking safe investment prior to the 1st of April, enabled the board to obtain the required amount at 4 per cent. per annum, to avail itself of the privilege reserved in the agreement with the bondholders, reserved in the agreement with the bondholders, of redeeming the mortgage debt at an earlier period than ten years. These bonds are now extinguished, and in their stead a floating debt has been established. The favorable terms on which this loan was effected, is evidence that the high credit which the company has heretofore enjoyed is unimpaired. With the continuation of a fair business, and no unforced continuation of a fair business, and no unforseen contingency, it is hoped that ere long this debt will also be liqui-dated, when dividends from the "net earnings" which have been long deferred, can be regularly declared, and when the stockholders who have evinced so much patience in not receiving direct returns from their investments, can congratulate themselves on possessing a road with its equipments, unencumbered with either a funded or a floating debt.

Capital stock paid in by stockholders.. \$110,905 Number of capital shares 20,000

The subjoined extract of the report of the Pittsburg and Boston Mining Company dated March, 1863, exhibits the results of the company's operations in 1862, and also the estimates for the current year 1863.

In 1858 a dividend of ten dollars per share was paid on 6,000 shares, and five dollars per share on 20,000 shares, the number of shares having been increased from 6,000 to 20,000 in that year. The

The mining year 1862 terminated with the month of November, and the Directors, in consequence of the delay in presenting their report, before referred to, are now enabled to give an approximate estimate of the operations of the year. The amount of rough copper produced was as

follows: Masses.1,295,700 lbs.
 Masses
 593,509 "

 Barrel work
 593,509 "

 Stampings
 1,273,238 "

Making a total of. 3,162,447 lbs. or 1,581 447-2000 tons, being an average monthly product of 131 1537-2000 tons.

Of the foregoing there were shipped during the season of navigation 1,447 432-2000 tons, leaving on hand at the mine and mine landing at the lake, 134 15-2000 tons.

The actual and estimated product in refined copper is as follows:

Copper already refined and sold	1,665,004 lbs
Copper in New York	50,336 "
Copper on hand at Pittsburg Furns	ice 13,000 "
Estimated amount in slags and s	lag hand haran
copper at furnace	88,800 "
Estimated product in refined cop	per allaftpaling
of the 134 14-2000 tons at the m	
at 62 77-100 per cent	168,233 "

Total probable product.....1,985,373 lbs.

There have already been sold of the year's product 1,665,004 lbs., realizing the sum of \$411,985 27, or a net average of 24 53-100 cents per pound,

after deducting commissions and freight on so much thereof as was sold in New York.

The probable cash receipts from sales of the entire product of the year may, therefore, be estimated with reasonable accuracy as follows: Copper already sold, as stated above .\$411,985 27 Copper, 50,336 lbs. in N.Y., estimated

17.617 60 35,630 00 and at the mine, 168,233 lbs. at 35 58.881 55

2,921 69 .\$527,036 11 5.310 18

Total receipts Ascertained expenses of the year\$300,902 61 Smelting charges for year, 24,000 00 probable

Making the total expenditures 324,902 51

And leaving a probable net profit on the operations of the year 1862 of .\$207,443 68 against \$60,370 13 for the year 1861.

In regard to the mining operations and prospects of the current year, it affords the Directors much pleasure to state that they are in the highest degree encouraging. Mr. Watson, the intelligent Super-intendent of the mine, gives us strong assurances intendent of the mine, gives us strong assurances predicated upon the general appearance of the mine at the present time, of a considerable increase in the product, and which will not, in all reasonable probability, fall below 1,700 tons—and may exceed that amount. The capacity of the mine, as will be seen by the Superintendent's report, is being gradually enlarged, and presented on the first day of July last, an area of 7,037 fathoms of ground opened for stoping, as against 6,129 fathoms at the corresponding period of the 6,129 fathoms at the corresponding period of the preceding year; being an increase during the year of 908 fathoms.

year of 908 fathoms.

The amount of ground stoped or worked out during the last named period, was 2,929 fathoms, producing an average of 1,060 lbs. of rough copper per fathom, and maintaining fully the general character of the Cliff lode, as one of the richest hitherto developed in this or any other country.

At a corresponding rate of yield per fathom, for the 7,037 fathoms already opened, the product would be 7,459,220 lbs. of rough copper, which estimated to contain 60 per cent. of pure copper, would produce 4,475,532 lbs., which at the present market value would command more than one million and a half of dollars.

million and a half of dollars.

If the expectations of the Directors should be realized by a product of 1,700 tons for the current year, equivalent at 60 per cent. to 1,020 tons of pure copper, and the present market value of the article should undergo no material change, the net earnings of the year will be very largely in excess of any previous year. Estimating that amount of copper at 35 cents per pound, a price considerably below the present ruling rates, the cash value of the product would be \$714,000; and assuming that the cost of production should be considerably increased, so that the expenditures may reach \$350,000, the resulting net profits would authorize dividends to the amount of \$18 per share; or if \$64,000 were added to the contingent fund or working capital, which it is desirable somewhat to increase, would leave a dividend fund equal to \$15 per share from the earnings of 1863.

Staten Island Railroad.

The Staten Island Railroad Company has been taken out of the hands of the receiver, and re-organized by the election of Wm. H. Vanderbilt, President; F. Ockershausen, Treasurer, and P Stevens, Secretary,

Railroads and Canals of Canada.

The following is an enumeration of the several railroads in the Province at the end of 1862-

† The Rideau Canal, constructed originally by the imperial government for military purposes, has only lately come into the hands of the provincial government, and as yet has cost simply the annual outlay for repairs.

THERE, ETERLE

Financial Condition of Minnesota.

Valuation-The valuation of property according to the census of 1850 and 1860 was as follows:

Census		Assessed valuation		Estimated or
Years.	Real estate.	Personal property.	Total.	true value.
1850	\$97,363	\$164,725	\$262,088	\$262,088
1860	25,391,771	6,722,002	32,118,773	52,294,413
The state of the s		APPROVE STATE OF THE PROPERTY		

The State valuation yearly since 1849 is shown in the annexed table:

	Coun	- Valua-	Popula-		Coun-	Valua-	Popula-
Years.	ties.	tion.	tion.	Years. 1856	ties.	tion.	tion.
1849	1	\$514,936	4,049	1856	24 \$2	4,394,395	100,000
1850	6	806,437	6,077	1857	31 4	9,336,673	150,037
1851	3	1,282,123	7,000	1858	37 4	1,846,778	156,000
1852	8	1,715,855	10,000	1859	40 3	5,564,498	162,000
1853	6	2,701,437	14,000	1860	41 8	6,738,460	172,123
1854	13	3,508,518	32,000	1861	41 8	8,712,427	185,000
1855	18	10,424,157	40,000	1862	43 8	0,000,000	200,000

The following table exhibits the elements of real and personal property in the State in 1860 & 1861:

		1000.	20021
Area of organized counties	acres	20,435,180	20,435,180
Land assessed		6,404,491	7,171,559
Land assessed	value	\$20,992,687	\$22,561,765
Real estate in cities and towns			
Total value of real estate	66	32,026,303	32,909,523
Value of personal property			5,802,904
Total valuation	66	36,738,410	38,712,427

the valuation for 1862 was largely decreased by the depopulation of the border counties on ac count of Indian disturbances and the Auditor considers the total valuation would not exceed

Taxation.—The taxes levied upon the people of Minnesota are equivalent on the average to a little more than one and a-half per cent, upon the assessed valuation; and supposing them divided equally among the population they amounted in 1860 to \$3.27 and in 1861 to \$3.32 per capita. It must be observed, however, that much the greater part of these taxes are for local purposes

The State tax in 1861 at 4 mills on the \$1 amounted to......\$152,919

The distribution of the several taxes in 1860 and 1861 is shown in the following table:

	1860	186	
	in mills Amount	Rate in mill	
State tax	dollar. of taxes, 4.00 \$146.933	4.00	of taxes. \$152,919
School tax			95.574
		2.50	
County tax		4.28	163,763
Township tax		1.07	41,035
Bridge tax	0.11 4,042		
Road tax	0.66 24,247	0.66	25,270
Poor tax	0.19 6,980	0.04	2,042
Other special tax*	3.00 110,215	3.90	148,780
Total1	5.35 \$563.913	16.06	\$613.958

* Includes city and town tax, which in 1861 was \$73,573 or 1.93 mills per centum.

It must not be inferred that the whole of the above taxes are collected. The State tax for 1860 was delinquent to the amount of \$43,877, and that for 1861 of \$91,173. Thus if every one paid his proper share, the quota might be materially diminished. From the commencement of the State government in 1858 to the end of 1862 the amount delinquent was \$292,682 sufficient for the ordinary expenses of the State for two years, or sufficient to pay off the State debt.

Receipts and Expenditures.—The returns for the year ending the 1st December, 1862, present the following forces:

lowing figures :

No legislative session in 1859.

Public Debt.—On the 1st December, 1862, the public debt of the State amounted to \$350,000, viz: per cent. loan of 13th March, 1858 \$250,000 per cent. loan of September, 1861. . . . 100,000

The laws authorizing these loans provided an annual tax sufficient for their redemption at maturity and for the payment of interest thereon. The tax levied is now two mills on the dollar valuation.

There was also outstanding on the 1st December, 1862, endorsed scrip to the amount of \$55,918. Besides the above the State has issued 25 years 7 per cent, bonds to the railroad companies of the State to the amount of \$2,275,000, for which it is

State to the amount of \$2,275,000, for which it is contingently liable for principal and interest.

Property of the State.—This consists chiefly of lands donated by Congress for schools, salines, etc. the actual extent of which is not yet ascertained. The quantity of school lands appraised up to the end of 1862 was 135,982 acres, of which 38,017 acres had been sold for \$242,531 which sum belongs to the permanent school fund. The State's interest in the railroads amounts as above to \$2,275,000.

Cape May and Millville Railroad.

On the 20th ult the cars commenced running on this road as far as Port Elizabeth; and we understand that in the course of a few days the extension of the road will be completed to Dennisville, which is about half way to Cape May. We learn that the arrangements of the Company are such as to afford a guaratee that the line will be extended to within a short distance of Cape May in time for the bathing season, and that the prospects for business upon it are, independent of the pleasure travel, of the most flattering character.

Milwaukee and St. Paul Railroad.

In the United States District Court of Wisconsin at Milwaukee, on the 7th ult., the following proceedings were had:

Ordered by the Court, That the Receiver deliver over to the Milwaukee and St. Paul Railway Company, the said railroad and appurtenances between

pany, the said railroad and appurtenances between Portage City and LaCrosse, and the rolling stock and property specially described in the decree.

And it is further ordered by the Court, That a full and perfect inventory be taken by the Receiver, of all rolling stock other than the forty box cars especially mentioned in the decree, and of all personal property belonging to the said LaCrosse and Milwaukee Railroad Company including such as Milwaukee Railroad Company, including such as have been procured by the Receiver now on hand, and that he make report of the same on the 8th day of June next. And as in pursuance of the act incorporating the LaCrosse and Milwaukee Railroad Company, a continuous road has been con-structed and operated between LaCrosse and Mil-waukee, and the interests of the public requiring that the said road as constructed and operated shall continue to be so operated, it is ordered by the Court (reserving the right to rescind, change or modify this order at any time hereafter) that the said Milwaukee and St. Paul Railway Company, and the receiver, who continues to be the receiver of the eastern end or division of said La Crosse and Milwaukee Railroad, between Mil-Crosse and Milwaukee Railroad, between Milwaukee and Portage City, jointly operate said road between LaCrosse and Milwaukee without interruption. That the said Milwaukee and St. Paul Railway Company, and the said receiver jointly employ all the agents and persons necessary for the proper operating of said road. That the revenues of said road be paid to the receiver as heretofore, who shall keep all accounts and books for the inspection of said Company, and said Company may keep duplicate books. And that all pany may keep duplicate books. And that all payments and disbursements for necessary ex-And that all penses in operating said road shall be paid out of the joint fund, each division of said road to be entitled to its proportion of revenue, and to be charged with its proportion of disbursements, and that the said receiver pay coupons of bonds in prior mortgages as heretofore.

[†] Including for extra legislative session \$6,906, and for extra printing \$1,800; also military expenses \$4,506.

The following were the closing prices for Amer-can Securities on the 22d May

American Railroad Journal.

Saturday, June 6, 1863.

Stock Exchange and Money Market.

There has been a more active demand for money the last week, naturally arising from the absorption of currency by the conversion of the 5 20's. which is now going on upon a large scale, and filling the treasury with ample means for the wants of the Government. We perceive from the Circular of S. Hallett & Co., which we reprint in another column, that Mr. Chase finds himself in so strong a financial position, that he is able to enunciate his general policy. In a letter to those gentlemen of recent date, he says no proposition for a permanent loan payable otherwise than in American gold, or anywhere else than at the U.S. Treasury, has ever been entertained or is likely to be entertained, and no authority has been given to any one to negotiate a loan abroad on any other terms, than would have been accepted for the same from American capitalists. It would seem however from the Secretary's letter notwithstanding, that at one time a foreign loan was not unconsidered. For it is very evident that if foreign capitalists had placed one or two hundred millions in our funds. it would have reduced foreign sympathy for the South by just about that extent.

We also learn that there is not in the Department a single unsatisfied disbursement in any branch of the public service.

Under these assurances the public have acquired fresh confidence in the stability of the public funds, and the certainty of their redemption. By the very act of conversion, the people themselves are adding to the power of the Government, sustaining

that cannot be employed at high profits, and preventing the necessity of a much further issue. The Railway market is steady and hopeful. The rise and fall in various descriptions are not large, and are attributable to combinations, and speculations for the moment, rather than for the future. Gold still lingers in the neighborhood of the fifties and exchange is 161 or thereabout. The balance in the Sub-treasury in this city on Tuesday was \$24,-557 50 and the week's exports were \$4,606,695 against \$3,301,894 the week preceding.

One of the problems of railway finance at the present moment, connected with the operations of Grant and Banks, and which is exciting considerable attention among railway speculators, is the effect to be produced on the future value and earnings of those lines of railway, which since the closing of the Mississippi, have enjoyed a monopoly of the western traffic. It is the opinion of some that the river once opened, the former current of business will be resumed; it is the opinion of others, that its trade having now found a new channel will continue to follow it, and that the Eastern railways will maintain their advantage.

We imagine that the laws of commerce will be found quite as inexorable in the future as in the past, and that the trade on the Mississippi will be governed hereafter, as it has been hitherto, by the cost of transportation and the purchasing capacity of New Orleans. Wherever goods can be taken at the cheapest rates and sold to the best advantage, there will be the favored mart of merchants and shippers.

In the first place, there is no such river in the whole world as the Mississippi. As our readers well know, it was discovered in 1672 by the celebrated Marquette, a priest of the Jesuits, who passing from Lake Champlain by the route of the Ottawa to Lake Huron, and thence making his way to the Fox river from Wisconsin, reached the Mississippi in Latitude 42° 50N. and floated down to the Arkansas, from which point he returned to Canada. In 1682 the fearless LaSalle sailed down the river, from Wisconsin to the Gulf of Mexico. The French however, took but little advantage from this discovery. The attempts to nothing. Not until its purchase from the Emperor Napoleon in 1803, did its commerce assume any value. In 1769 New Orleans had a population of seven years after it had become Americanized 17.242: in 1820, 27.176: in 1830, 46.310: in 1840. 102.193; in 1850, 116,375; in 1860 it had reached 168,675. Its extent of steamer navigation through its numerous tributaries is fully 20,000 miles, and its proximity to the West Indies and Central and South America, gives it unrivalled advantages as a commercial port. Its business having been stigigantic strides, and its foreign exports were only these advantages were forgotten in a moment of folly, and New Orleans which consented to follow the fortunes of a few ambitious and unscrupulous politicians, sacrificed her real and solid interests. Recent events however indicate that a reaction in the sentiments of the people of Louisiana has sidered. It will under the most favorable circum- 1101/2; do., old, 110; do., coupon, 1091/2.

the currency by withdrawing from circulation all taken place, and within a few weeks past, there have been strong indications of a desire of the planters to re-enter the Union under the old condition of things, while thousands of bales of cotton and hogsheads of sugar have now made their appearance on the levees ready for export, and the supplies are coming in with unexpected regularity. Counting upon a restoration of the former political status we must expect a return of its normal effects, and we therefore do not doubt that on the return of peace the commercial advantages of New Orleans will re-assert their power and influ-

It is well known that the cities of Cincinnati and St. Louis have made loud complaints at the heavy losses sustained in their business in consequence of the charge in its route. The increased charges on railway transportation have been an actual loss to production. It is asserted that millions of dollars have been sunk by their producing customers, in the cost of freight by the railway lines, and fully understanding this, it has been one of the temptations held out by the Confederate Government to the North Western States, that by joining it in their efforts to establish their independence, the free navigation of the Mississippi should be secured to them. And it is the opinion of many intelligent and patriotic Union men of the Western States, that should the North consent to a separation of the States, all the States lying on the Mississippi and Missouri, under the inexorable necessities of commerce, would be compelled finally to join their fate with that of the confederates. We can see then that the opening of the Mississippi is a necessity for the preservation of the Union, and the operations of our armies in that quarter, are not merely to be estimated for their importance as a means of military success, but as a commercial and political agency of the very greatest consequence. The whole question then takes this form. Given any point on the Missouri and Mississippi, which is the cheapest route to the place from which the products of the vallies they drain, can be exported? If it is cheaper to send bulky articles such as cotton, tobacco, whiskey, bacon and sugar to New Orleans than by the Northern or Central Railway routes to New York. that is the direction those articles will take. No open a trade under the lead of M. Crozat, and Chambers of Commerce, no railway combinations, afterwards by the Mississippi Company ended in no newspaper opinions will have the least effect in preventing it.

We imagine therefore that our Eastern railways must reasonably expect a diminution in their 3,190; in 1788, 5,331; in 1797, 8,056; in 1810 traffic, certainly to the extent we have indicated, nor will a reduction in their rates make any material difference. On the other hand, they may fairly expect to gain from the increased production, and the demands of the increasing population of the North Western States, all the business they may lose by the opening of the Mississippi. To this result they have a right to look with confidence. And with no narrow spirit of jealousy, mulated by northern enterprise, increased with should they regard a return to the former condition of things. The great rivers of the West like second to those of the city of New York. All the great Lakes of the North, are priceless blessings to the people who inhabit their shores. Without them, our Country would have been but a trackless waste, and our commerce of but little value.

There is still another circumstance to be con-

stances be several years before the navigation of the Mississippi can assume its former peaceful character, and the passage of merchant steamers become entirely safe. Every possible obstruction will be interposed by hostile parties lurking along its banks, and a guerilla warfare kept up, will be as fatal to its commerce, as the possession of Vicksburg or Port Hudson.

The restoration of business will therefore be gradual on this river, and in that respect will give the Eastern Railway Companies time to adjust their business and conform their regulations to the changes. So that a sudden and absolute diminution of their traffic is not to be anticipated, and the market will not break down by any immediate revulsion. In such cases of gradual change, losses are divided infinitesimally and "no body is hurt."

New Railroad Route.

We learn from the Philadelphia Ledger that Surveyors are now engaged in surveying the road which is to connect the Philadelphia and Trenton Railroad with the Pennsylvania Railroad, in accordance with a charter recently obtained. The new route is to connect with the Trenton road near Frankford, and run westwardly, crossing the Second street road near Nicetown lane, and thence crossing the Germantown Pike near Rising Sun village and the Lamb tavern, and passing the west side of Glenwood and Odd Fellows' Cemetery, to the river Schuylkill near Girard avenue, at which point it will connect with the Pennsylvania Railroad, so as to have the use of the junction road now under construction. By means of this route, passenger cars and government freight can be run directly through from New York to Washington, without change of cars.

National Canal Convention.

In another place, we publish the brief proceedings of the Convention held at Chicago, in relation to the subject of a Ship Canal. We regret that its session produced nothing but a few resolutions of a general character; no statistics, estimates, or opinions of Engineers were brought forward on this occasion, to give the public any precise information on the subject, when just now, they would have been of great value. There are ample materials, private and official, including the report of Mr. Gallatin in 1811, those of Mr. Corwin when Secretary of the Treasury, of the Board of Trade of Montreal, and the recent one of the Committee of the Canadian Parliament, which in careful hands. would have shed much light on the business and necessities of the Great West.

The Towsontown Passenger Railway.

The work on the Passenger Railway on the York Turnpike is progressing with vigor. It was expected that by this time the track would be laid to near Govanstown, and by another month to Towsontown. The ballasting being a tedious pro-cess will consume another month, so that it is not expected to have the cars running before the first of August. In addition to the line connecting with Charles street line, there will be a line laid along Greenmount Avenue, connecting with Gay street line, the timber and rails being prepared and deposited on the street ready for the excavation of the street. At the Towsontown terminus the depot and stables will be erected on the old toll gate lot, at the intersection of Pennsylvania Avenue with the York Turnpike, just below Ady's hotel .- Towsontown, Baltimore, Adv.

Railroad Police.

The New York Legislature, at its last session, passed an act empowering the Governor to appassed an act empowering the Governor to appoint policemen on railways, on the application of third party—Cleveland, Painesville & Ashtabula the proper officers of the respective companies, The salaries and other expenses are to be paid by those parties who make the application. The bill was prepared by Mr. Hugh Masterson, a detective on the Erie Railway, and the passage of the law was mainly due to his exertions. The law as it was passed, gives the same power to the policemen on the several railroads of this State as is granted to the police of the towns, cities, and villages through which the roads pass, thus enabling them to make arrests for crime in any county throughout the line of the roads. The law has just been put into operation upon the admirably.

The British Quarterlies.

The last number of the London Quarterly contains a valuable article on the industrial resources of India, from which we learn much of the railway system of that country, prosecuted on a gigantic scale. Two thousand ave hundred miles are now in operation, and two thousand more will be, in the course of another year. We are under obligations to the American publishers, Messrs. Scott, Walker & Craighead, for early copies of these Quarterlies, now issued from their new office, 38 Walker street. We do not see how any family, east pretensions to a love of literature, can be without these, the most valuable and interesting reprints of the day.

Consolidation of the Lake Shore, and Cleveland, Columbus and Cincinnati, Railroads.

The annual meeting of the stockholders of the Cleveland Painesville and Ashtabula Railroad Company will be held in Cleveland on the 10th inst., for the election of directors, and for the transaction of such other business as may come before them. There will also be held at Cleveland on the same day, a special meeting of the Cleveland, Columbus and Cincinnati Railroad Company. At these meetings there will be submitted for the approval or disapproval of the stockholders, a contract entered into on the 8th ult., by the Convention of Directors, for a joint running arrangement of these Companies, with the Cleveland and Toledo, the Erie and North East, and the Buffalo and State Line Railroad Companies.

The terms of the consolidation of traffic, previously agreed upon by the several boards of directors, are substantially as follows:

ARTICLE 1. That the earnings of the Roads owned by the parties hereto, which shall consist of earnings and income derived from the transportation of persons and property, mails and ex-press, rents of tracks (where the rents are received instead of and for the Company's proportion of fares and freight), and also all other income de-rived, by rent or otherwise, from the use, by railroads and others, of depots or tracks; and also income from all real estate and fixtures used or retained by either of the parties, for depot or track purposes, shall be aggregated and divided between the parties, in manner as provided in Article 2.

ART. 2. From the earning derived by each party hereto from the sources mentioned in Article 1. fifty [50] per cent. thereof shall be retained for running expenses, &c., by each party, on the amount earned by them respectively, and the balance of said gross earnings, shall be aggregated and divided between them in the following proportion, to wit: The said first party—Cleveland, Columbus & Cincinnati—shall receive twenty-eight [28] per cent. thereof; the said second party—Cleveland and Toledo—shall receive twenty-one

shall receive twenty-six and ninety-three hundredths [26 93-100] per cent. thereof; and the said fourth party—Buffalo and State Line—shall receive twenty-three and fifty-seven hundredths [23 57-100] per cent. thereof.

"The objects to be attained by this arrangement," as stated in the Circular of L. M. Hubby, Esq., President of the C., C. & C. R. R. Co., " are the allaying of jealousies and competition, and the saving the expenditure of money growing out of such jealousies and competition; the more equal distribution of cars; the more perfect connection of tracks and trains, and the more equal distribution of the expense thereof; and the mu-Erie, the New York Central and the Hudson River tual protection that would be afforded by the Railroads, and thus far it is said to have worked united company, against formidable competing

these Companies would have a strength, it is he to successfully meet any competition that might be brought against them; while either Company, singly, might not be so fortunate. In this arrangement neither Company parts with any of its corporate rights, or the advantages of separate management."

Jefferson Railroad, Pennsylvania.

Engineers are engaged in surveying the route for the Jefferson Railroad from Hawley via Hones dale to Lanesboro. There are two routes in view
—one along the Lackawaxen Creek through Prompton and thence north; the other along Dy berry Creek directly north from Honesdale. former route is said to be a very easy grade, and would undoubtedly be more advantageous and convenient for this section; but the latter is for the interest of Honesdale. - Carbondale Advance, May 23.

LaCrosse and Milwaukee Railroad.

In reference to the eastern division of this road, the Mercantile Democrat of April 11th, says

" An application was made in the United States District Court, on Wednesday, for the possession by the Milwaukee and Minnesota Company, of the eastern division of the LaCrosse Road. This, of eastern division of the LaCrosse Road. This, of course, involves the dismissal of the present Receiver of the road. The argument by the Minnesota Company, in favor of the application, was heard on Wednesday afternoon. The Court refused to hear the argument on the other side, until he had taken time to consider whether he would entertain the application at all. tertain the application at all. Yesterday morning the Court decided not to entertain the application thus leaving the eastern division of the road still in the hands of those now running it,"

Long Dock Company.

The annexed circular has been issued by the Long Dock Company:

OFFICE OF LONG DOCK Co., ERIE BUILDINGS, NEW YORK, June 1, 1863.

the Shareholders and Creditors of the Long

Dock Company.

The Erie Railway Company having given notice of its intention to pay off the amount tal of this company in twelve months from the 1st of June, 1863, (whereupon, as successors to the rights of the New York and Erie Railroad Comrights of the New York and Erie Railroad Company, the Erie Railway Company will be entitled to receive possession of the entire property of this company, upon assuming all the liabilities secured upon the property which may then exist,) in pursuance of and in accordance with the contract with the New York and Eric Railroad Company, dated July 1, 1856, and the contract supple-

mental thereto, dated April 1, 1857.

And the directors of this company having, at the request of the Erie Railway Company, authorized the issue of 3,000 of its bonds of \$1,000 each, payable in thirty years, bearing interest at 7 per cent. per annum, payable semi-annually on the lst days of June and December, for the purpose of reducing and discharging liens, interest and debts for which this company is responsible, &c., said three thousand bonds being secured by a new mortgage upon the property and franchises of this company executed to John Earl, William and Dudley S. Gregory as Trustees, with a stipulation in said mortgage that eight hundred of said bonds shall be issued only for the purpose of paying off the capital stock; and that five hundred of said bonds shall be used to pay (or exchange for) the five hundred bonds of this com-pany dated the 15th of August, 1857; and a further stipulation that four hundred of said bonds, or such part thereof as may be neces for that purpose, shall be issued only to pay off the principal due and to become due on existing mortgages on said property given for the purchase money of the lands and real estate.

Notice is hereby given that should the sharereads, constructed and being constructed. United, holders of this company elect, within sixty days from the 1st of June, 1863, to surrender their New York, the Hon. Erastus Corning; New Jershares to the company, they will receive in lieu thereof and in exchange for every \$1,000 of said stock so surrendered one mortgage bond of the proposed issue at par, with 3 per cent. in cash in addition at the time of the exchange; said cash payment being an equivalent to a prepayment for one year of the amount that would be due or payable on said stock (under said contracts) beyond the amount of interest that will be received on the bonds taken in exchange for the stock.

To holders of said five hundred bonds the privi-

lege is extended of exchanging their bonds for those of the proposed issue, with the right to receive at par, at the time of the exchange, one additional bond for every bond so exchanged. The election to make such exchange is also to be

made within said sixty days.

HORATIO N. OTIS, Treasurer L. D. Co.

National Canal Convention.

The National Canal Convention assembled at Chicago on the 2d June inst., C. J. Filley, Mayor of St. Louis, was appointed temporary chairman, assisted by M. M. Strong of Wisconsin, A. M. Clapp of Buffalo, and W. H. McHenry of St. Louis as temporary Secretaries. The convention was welcomed to Chicago by Dr. Brainard in behalf of the Board of Trade, Mercantile Association and the citizens generally. A committee of two from each State, one from each territory and from the District of Columbia was chosen to nominate permanent officers and prepare the rules of proceeding. The convention then adjourned to 3 P. M. to receive the report of the committee on organization. On re-assembling at that hour, the committee through Gov. King, reported the Hon, Hannibal Hamlin for President, and the Hon. Hiram Walbridge, who had been unanimously proposed by the New York delegation in the committee for President, as Vice-President at large and the following additional Vice-Presidents From Maine, Jedediah Jewett; New Hampshire, Hon. J. M. Edwards; Vermont, Lewis Follet; Massachusetts, Lorenzo Sabine; Rhode Island, the

sey, Marcus L. Ward; Ohfo, D. S. Scott; Indiana, the Hon. Geo. W. Julian; Illinois, Gen. James W. Singleton; Michigan, A. E. Bissell; Wisconsin Levi Blossom; Minnesota, the Hon. J. M. Taylor; Iowa, Ebenezer Cook; Missouri, George Partridge; Kansas, Marcus J. Parrott; District of Columbia, Dr. Peter Barker.

For Secretary at large, Col. J. W. Foster, and one Secretary for each State were named.

The report was unanimously adopted.

The President on taking the chair returned thanks for the honor conferred. Various routine resolutions were then adopted, and speeches followed from Gen. Walbridge and Mr. Drake, and the convention adjourned until the next day to meet at 9 A. M.

At the appointed hour, Mr. Ruggles offered a resolution in favor of a ship canal around Niagara Falls, and debate was had thereon. At the afternoon session the following preamble and resolutions were reported from the committee:

The loval States assembled in national conven tion at Chicago, desirous of cementing closer the Union, for perpetuating our nationality forever, of providing for the common defense and promoting the general welfare of our whole country, adopt the following resolutions

First. That we regard the construction and enlargement of the canals between the Mississippi and the Atlantic, with canals duly connecting the lakes, as of great military and commercial importance. We believe such enlargement or con-struction with dimensions sufficient to pass gunboats from the Mississippi to Lake Michigan, and from the Atlantic to and from the Great Lakes will furnish the cheapest and most expeditious means of protecting the Northern frontier, and at the same time will promote the rapid development of the union of our whole country.

Second. That these works are demanded alike by military prudence, political wisdom, and the necessities of commerce. Such works will be not only National but Continental, and their accomplishment is required by every principle of sound

political economy.

Third. That such national highway, between the Mississippi and the lakes, as far as practicable should be free, without tolls or restrictions, and we should deprecate the placing of this great thoroughfare in the hands of any private corpora-tion, or State. The work should be accomplished by the national credit, and as soon as the cost is reimbursed to the National Treasury, should be free as the lakes to the commerce of the world.

The resolutions were adopted without a dissent

Mr. Ruggles for himself offered a resolution that the Convention is of the opinion that the increased stimulus to be given to agriculture and commerce by the proposed enlargement of the canals will far increase the foreign commerce of the country; that the import duties on return cargoes will very far exceed the interest on the cost of the proposed works, and produce a fund for its rapid reimbursement. Carried unanimous-

A resolution was adopted for the appointment of a Committee by the President to prepare a memorial to the President and Congress, presenting the views of the Convention, and urging the passage of laws necessary to carry them into full effect; the Committee to have power to open such correspondence as may be expedient, and in their discretion call any further convention, five members of said Committee, at any meeting duly rati-Hon. J. R. Arnold; Connecticut, Calvin Day; fied by the Chairman, to constitute a quorum

The President of the Convention announced the Committee as follows:

N. Arnold of Illinois, Samuel L. Carey, of Kentucky, Henry L. Dawes of Massachusetts, S. C. Hersey of Maine, S. M. Edwards of New Hampshire, J. S. Morrill of Vermont, Duncan Stewart of Michigan, R. J. Arnold of Rhode Island, Calvin Day of Connecticut, S. J. Howe of Michigan, P. Chamberlain of Ohio, R. P. Hill of Iowa, E. Nye of New Jersey, A. E. Lowe of New York, R. Blaksley of Minnesota, Dr. Anthony of Kansas, and J. T. Lewis of Wisconsin.

Gen. Walbridge of New York closed the Convention by submitting a series of patriotic resolutions which were carried amid intense enthusiasm, after which the Convention adjourned sine die.

The Financial Policy of the Government. Important Letter from the Secretary of the Treasury.

Among the many invitations to the investment of capital, a crowd of commercial and productive enterprises divide attention with the National Loans. For the payment of the latter, is pledged the faith of a nation rich in all the resources of positive wealth; while the safety of the former is also largely dependant upon the financial policy to be pursued by the Gov-ernment. We had intended this week to discuss that policy and examine the guaranties offered to the lender, the producer and the trader; but most of this labor happily has been spared us by the receipt of a letter from the Secretary of the Treasury, giving important facts in regard to the condition of his department and declaring his policy in reference to various perplexing questions which he has been compelled to determine. We regret that we have not permission to publish the letter itself; a document so comprehensive in its ideas, so clear in its statements, so frank in its declaration and so patriotic in its spirit, that it would have been no less creditable to the author than satisfactory to the public. As it is, we must content ourselves with the use of the facts it contains, adding a few comments by way of illustration.

1. "No proposition for a permanent loan, payable otherwise than in American gold, or anywhere else than at the Treasury of the United States, has ever been entertained, or is likely to be entertained" by the present head of the department; and "no authority has been given to any one to negotiate a loan abroad on any other terms than would have been accepted for the same loan from American capitalists."

It appears that the idea of inviting proposals both at home and abroad, for a loan payable after ten years, has been postponed if not definitely abandoned, in consequence of the great success of the Five-Twenty subscriptions; "and all authority to receive proposals abroad for such a loan, was withdrawn as soon as it was determined not to ask for it at home." The Secretary does not now judge it desirable to receive a large foreign loan, even for Five-Twenties at par in New York. He does not admit the idea that under any circumstances, foreign capitalists or business men should be preferred to our own; and this sentiment is no less wise than patriotic, appreciated as it is by the peo-ple who are so liberally rallying to his support.

2. "There is not in the Department a single unsatisfied requisition for disbursement in any branch of the public service. The Army has been paid in full to the first of March, and the payment to the first of May, already largely advanced, will soon be completed. Unless se rious military reverses should be experienced,

there is every reason to believe that on the first of June (the letter bears date May 25th,) every liquidated demand on the Treasury will have been satisfied, and that our financial condition will be more satisfactory than at any period since the outbreak of the rebellion." This, of course, is independent of the large debt contracted during the war.

3. The Department has no Agents abroad for the negotiations of Loans. Certain gentlemen who went to Europe on other business, incidentally were authorized to receive proposals for Loans; but even that authority has since been withdrawn. The errand of Hon. Robert J. Walker, who was meditating the trip on matters of private business, but who went at the Secretary's request, was not at all to borrow money, but to correct, in the financial circles abroad with which he is familiar, "serious misapprehensions in regard to our resources and strength." It is a source of satisfaction to know in this object, the labors of the distinguished ex-Secretary have been eminently successful.

These are the chief points discussed, and they are of great gravity in their bearing upon the financial future of the country. The well-known intention of Secretary Chase to sub-stitute National Bank Notes for the present currency, as fast as it can readily be done, does not materially affect us; as the volume of currency will, in either case, be made commensurate with the necessities of the country and the war.

From the commencement of the rebellion,

n

its convulsions have agitated the financial, no less than the political world. Commerce has been interrupted and its channels changed; immense values have been in many instances destroyed, and in others newly created; the character of the currency has been revolutionized, so that the rates of foreign exchange depend more upon the momentary mercantile value of gold, than, as heretofore, on the bal-ances of trade. These results were inevitable in a country so new as ours, while prosecuting a gigantic war, subject to the open disapproval and the secret but active hostility of the great powers of Europe. We were too young to have realized large accumulations of capital; and yet our necessities demanded the most extraordinary expenditures. It only remained for the Government, looking boldly in the face all the dangers that beset it, to devise and execute such measures as should supply a needy ex-chequer, by means drawn from the resources of the country itself, and yet procured without oppressing the people by onerous burdens of taxation, and without paralyzing the various industries which are the source of our national power.

That the measures adopted and now in full operation, have fulfilled these wise conditions, let the results attest. A Treasury amply supplied, a rapidly improving national credit, an entire absence of floating debt, (except the Treasury Notes used as currency,) a state of unexampled industrial activity and pecuniary comfort among the people;—these are the present fruits, towards which the hands of un-willing Europe are already being extended. Never was money more plenty or more productive; never were investments more rich in reliable income. To compare the condition of our people with that of the needy operatives of Lancashire or Lyons, would be unkind; the comparison is already made by the latter, and the answer is given in the swelling current of emigration again setting westward across the

The Secretary of the Treasury has well chosen this moment to declare to the peo-

ple the success of his measures, and to assure them of a stable policy in the future. He will ask no loans at present, except as the work of conversions continues; least of all, will he offer to the foreign capitalist, terms more profitable than he has already accepted from the Amer-ican. If the European lender now desires to invest in the richest income-paying national securities in the world, he must come into the American market and compete fairly with the American people in his purchase. This assurance is invaluable to those now investing in the Five-Twenty Bonds of the Government.

So far, too, as his policy can affect the rates and supply of money, it seems to be all that our business men can desire. The absorption of currency will be gradual, and continually relieved by disbursements, and by the creation of new currency which the requirements of the War Department render inevitable. He evidently alike deprecates inflation and panic; and will avoid measures likely to result in sudden and feverish fluctuations in prices; preferring even that the desirable depreciation of gold, shall occur gradually and from natural causes, rather than so suddenly as to create stringency and loss and distress. The whole plan of his financial system, aims at stability. From a policy so wisely inspired, we can derive no other augury than one of sustained confidence on the part of the people, and continued and increasing ease in money; and these must prove the prolific parents of such renewed activity in American industry, as will make the present but the commencement of a new era of individual enterprise and national prosperity, such as no past years of the Republic ever have witnessed.—Samuel Hallett & Co.'s American Circular.

Dated New York, May 1, 1863.

LIMITED PARTNERSHIP.

Notice is hereby given that the undersigned, JEN-KINS VAN SCHAICK, STEPHEN R. MASSETT, WILLIAM R. TRAVERS and GEORGE A. OSGOOD, all of whom reside in the city of New York, have this day formed a limited partnership pursuant to the provisions of the first title of the fourth chapter of the second part of the Revised Statutes of the State of New York, and the various acts of the Legislature amendatory thereof.

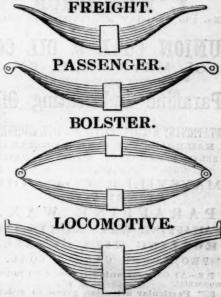

That the name of or firm under which the said partnership is to be conducted, is VAN SCHAICK & MASSETT.

That the general nature of the business to be transacted is the Stock Exchange and Brokerage business, and all financial transactions connected therewith, on commission. That the said JENKINS VAN SCHAICK and STEPHEN F. MASSETT are the general partners, and that the respective places of residence of the said general partners, are as hereinbefore stated, and the business of the said partnership is to be carried on in the City of New York. That each of the said special partners has contributed, as capital to the common stock of the said partnership, the sum of fifty thousand dollars. That the said co-partnership commences the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-three, and will terminate on the first day of May, one thousand eight hundred and sixty-three, and will terminate will be supported by the said partners.

WILLIAM R. TRAVERS, GEORGE A. OSGOOD, Special Partners.

SMITH'S

Railroad Air Light Comp'y.

THIS COMPANY OWNS THE EXCLUSIVE RIGHT of SMITH'S AIR LIGHT FOR RAILROADS, and is prepared to sell to Roads the right to use the same. We have arrangements perfected for furnishing Lamps and Burners at about the same price charged for the Oil and Kerosene Lamps by other Manufacturers.

That Railroad Managers may know the value of this LIGHT we annex letters from the Hon. CHAUNCEY VIBBARD, the General Superintendent of the New York Central Railroad, and also from the Master Mechanics of the same road, showing its comparative cost with that of Oil Lights:

NEW YORK CENTRAL RAILROAD, GENERAL SUPERINTENDENT'S OFFICE, ALBANY, November 15, 1862.

To the Managers of Railroads:

Gentlemen,—This Company has adopted and is furnishing all their locomotives with the "SMITH AIR HEAD LIGHT."

They do this both on account of economy and the very superior light it affords.

We regard it as vastly superior to any light that has ever seen produced, and commend it to the consideration of rail

Very respectfully, etc., C. VIBBARD, Gen'l Sup't.

NEW YORK CENTRAL RAILROAD, MASTER MECHANIC'S OFFICE, ROCHESTER, Feb. 2, 1863.

DR. GEORGE HAND SMITH:

Dear Sir,—In answer to your inquiries in reference to your Air Light, I would state that we have upon this division of the road 28 of your lights on your first class passenger and freight engines. I find the light consumes about five feet of common gas per hour, which, at the price of gas at this place, \$2½ per thousand, makes the cost of light for each engine 1½ cents per hour.

Renewing my often expressed opinion that your light, for its reliability, its economy and superiority, far exceeds any light heretofore used on engines,

I remain, very truly, yours, etc.,

DAVID UPTON,

Master Mechanic, Western Division.

300 days, 5 hours each day, 1,500 hours, 1½ cer hour . . \$18 75

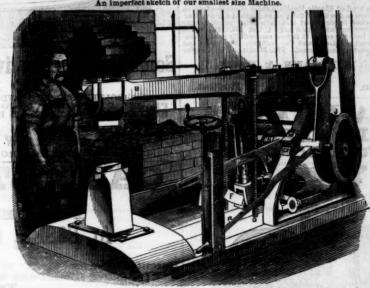

300 days, 5 hours each day, 1,500 hours, 1½c. per hour . \$18 75 One-sixth waste of gas 3 12 Repairs of lamps for one year 5 00 \$26 87

Further information may be obtained at the office of the Company, 21 Nassau st., or by addressing

CHAS. W. WELSH, Secretary.

AMES IRON WORKS

SOLE AND EXCLUSIVE OWNERS AND MANUFACTURERS, UNDER PAYE'S PATENT.

PAYE'S PATENT FORGE HAMMER, A HAMMER ADAPTED TO BOTH HEAVY AND LIGHT FORGINGS, with an adjustable stroke of from one lich to three feet. This hammer is adapted to both heavy and light forgings; the force of the blow being entirely at the will of the operator, and for all forgings under six inches, either round or square, is the best hammer now in use, and requires but one-half the power used by every other hammer to do the same work. For an angraving and description of this hammer, see page 1, Vol. V (new series) of the Scientific American; some valuable improvements have, however, been since made. All communications should be addressed to H. M. Ames, Box 429, New York, or Ames Iron Works, Oswego, N. Y.

These hammers may be seen in operation at the Allaire, Neptune, Secor, Delamater, Fletcher & Harrison, Duncan & Crampton, Anderson & McLaren, Duhurst & Emerson, Charles T. Porter, all in New York City; Joseph Colwell, Jersey City; Wm. White, Newark, N. J.; Providence (R. I.) Tool Co.; Whiting & Wilcox Kairh's Point, Phila; Mallory & Cottrell, Mystic, Conn.; J. Dillion, Rondout; James Horner & Co., Sing Sing; Henry Esler & Co., Brooklyn; James B. Eads, St. Louis, Mo.; Central Railroad Shop, Albany; Burlington, Quiney & Chicago Railroad Shop, Ames Iron Works, Oswego; M. Guineness, Albany; Sweet Brothers, Syracuse.

RESPECTFULLY ask attention to their stock of Machinesis and Brassfinishers' tools from the establishment of Mesers. Gro. H. Pox & Co., of Boston.

Nisson's Patent Screw Chasing Lathe manufactured solely by the above firm is without a rivid or substitute for the manufacture of Cocks, Vulves, Hose Couplings, Steam and Gas Fittings, and general Brass Finishing.

They have and are constantly receiving from the same celebrated manufacturers, Chucks, and Slide Rests, Shafting, Pullies, Hangers, etc.

The Hangers are to be not manufactured by them are of the most approved kind. The bearing being suspended by a universal joint; its advantages over the rigid Hanger will be at once seen and appreciat d by any mechanic. It is every way calculated for economy, being fitted with a patent box, which adjusts itself to the shaft, and they guarantee it to run six Months without associated and sometimes destructive effects of the dripping of oil from shabes.

and sometimes destructive effects of the dripping of oil from above.

EILE VATORS

For warehouses, manufactories, hotels, mechanics' shops, stores, or any other use where power Elevators are required; they guarantee all the safety that can be combined in any machine that is made. They are arranged with an improved apparatus, to hold the load in case the rope parts, which is unertin; also an invention of their own, to automatically arrest the descent of the load, if by any cause it should move downwar is beyond the prescribed speed.

They also manufacture and are the exclusive licensees of Otis Taft's Patent Elevator. The distinctive features are: the winding drum is driven by an endless scrow—two or more ropes are used in-toad of one, thereby insuring more than double the safety—a peculiar mode of shipping the driving Belts, which insures it to stop at the required point. It operates without noise or jarring.

Betting, Belt Lacing, and Picket's Patent Belt Fastening top on hand and furnished to order. Steam and Water Gauges Gauge Cocks, Packard's Patent Batchet Drills.

All BELT TOM ETAL

BABBITT METAL.

Parties wanting Shafting, Elevators, or any other machinery, will be waited on be an experienced Engineer, their premises surveyed, plans and estimates made, machinery located, and the crection superintended when desired.

Having made this branch of Engineering a SPECIALITY the past on vears with uniform success, they confidently offer their services to those requiring such aid.

VENTILATION.

THE undersigned has devised and patented the only system of VENTILATION for Buildings, Vessels, RAIL-ROAD CARS, etc., by which spontaneous ventilation can be effectually carried out; and is willing to dispose of the same to parties desirous of purchasing at a reasonable price.
